

Hepworth's Freezer Jacket C-J2

Applications Cold Storage Freezers Cold Climate Work

Temperature Rating

Can be worn down to -76° F (-60° C)
 Comfort levels will differ for each individual depending on the environment, exposure time, application and undergarments. Additional protection can be added by including thermal garments under the freezer wear.

Description

Three-quarter length freezer jacket in ripstop nylon, polyester fiber insulated for all cold conditions. Double thick nylon reinforcements on front and arms. Knitted collar and cuffs for extra comfort.

Features

Water resistant ripstop nylon is interwoven with reinforcement threads which make it resistant to tearing and ripping. High visibility safety panels on front, back and arms. Nylon lining is channel quilted with thick bonded, polyester fiber insulation. Heavy duty double side zippers under a hook-and-loop touch tape, storm seal cover. Roomy hand warming and utility pockets, upper chest pocket and two useful arm pockets. Internal drawstring delivers a snug fit. Generous bulk knit collar and concealed draft-free knit wrists. 3M reflective tape.
