

CLAW COVER® FS-C1

Designed for Dexterity, Strong on Cut Protection

APPLICATIONS

Direct Food Contact
Restaurants
Supermarket Prepared Foods/Deli
Non-Commercial Foodservice
Liner Glove

COLORS

FEATURES

For fingertip sensitivity and manual dexterity, choose the thin, ultra light weight FS-C1 foodservice glove. High performance fibers deliver ANSI A4 cut resistance, protecting the wearer from the lacerations common to commercial, noncommercial and retail operations. The FS-C1 is 21 CFR compliant and approved for direct food contact. Antimicrobial treatment supplies microbe-inhibiting protection. Excellent laundry characteristics – including the opportunity for moderate use of bleach – delivers long wear life and exceptional product value. To clean, use a washing machine or dishwasher with a maximum heat of 180° F, or the 3 sink method. This glove is often chosen as a liner glove. Made in the USA.
