

MS13ATA/PE4HVO

Ultra Light Weight and High Visibility

WITHOUT THUMBHOLE

WITH THUMBHOLE

PREMIUM HOOK-AND-LOOP CLOSURE

APPLICATIONS

- Automotive Assembly
- Metal Fabrication
- Glass Plants
- Material Handling
- Parts Assembly
- Manufacturing

FEATURES

Increasing wearer comfort leads to increased compliance. That's the idea behind the new MS13ATA/PE4HVO sleeve. With a V-slot and premium hook-and-loop closure at the top of the arm, even workers with large arms can create a custom fit. This light-weight, 1 ply sleeve provides solid ANSI A4 cut protection thanks to a new fiber blend featuring ATA® Technology with HPPE. Elastane plaiting provides a cool and comfortable feel, with great stretch. Antimicrobial protection helps to prevent and reduce bacterial growth. Plus the high-vis color helps to increase safety awareness and compliance. Available with and without thumbhole. Made in the USA.
